

## AL PRESENTMENT OF THE GRAND JURY

RECOMMENDATIONS MADE,  
NOTHING OF IMPORTANCE  
TRANSACTION, ONLY TWO  
MENTS BEING RETURN-

to payment as witnesses before the grand jury.

We have examined into the books and records of the several county officials and have also examined the county jail, county court house and county poor farm.

We are pleased to report that the books and records of the several county officials are exceptionally neat and systematically kept, and, so far as we could judge, were correct in every particular.

We find that it has not been the custom in the past to have the impression of the county seal on county warrants, and we have called the especial attention of the clerk of the court and the county treasurer and the tax collector to sections 554, 585 and 586 of the revised statutes, which embrace in part the duties of these officers with reference to county warrants, and we have suggested to the county clerk to place the seal on all warrants in the future, and we have also suggested to the treasurer that in future that he neither register or pay any county warrant unless same has the seal of the clerk thereon, and that he require the seal of the board of public instruction of the county on all school warrants before paying them.

In this connection, and in view of the fact that both the treasurer and the tax collector have only recently been elected to their respective offices, we recommend that as soon as practical that the county commissioners, the clerk of the circuit court, who is ex-officio clerk of the board of county commissioners, the tax collector and the treasurer meet together and call to their assistance the county attorney and fully consider their respective duties as such officers. We think that by doing this they will be enabled to discharge their duties in full accord with the letter and the spirit of the law in every particular.

We found the poor farm in excellent condition. Everything in and about the farm is neat and clean and the inmates, about twelve in number, are well cared for, healthy and contented; a nice garden, well advanced for this season of the year, was in evidence and the crop, fences, building, etc., are in very satisfactory condition.

There is a good cow on the farm that has been furnishing quantities of good, wholesome milk for the inmates but she is about to go dry, and we suggest that a fresh cow be purchased and sent to the farm. We call the attention of the county commissioners to the fact that the support of the water tank at the farm is too weak to support the tank when filled to its capacity and the keeper advises us that he only fills the tank about half full on that account. We suggest that the support to the tank be repaired and strengthened at once so that the tank may be filled to its full capacity, for if the top of the tank is left unfilled and exposed it will cause damage to the tank.

We feel that Mr. Williams, the keeper, should receive special mention at our hands for the excellent condition in which he keeps the farm. The books at the jail received our special consideration, and we are pleased to report that they are in good systematic condition and are neatly kept. We find that the entire jail is in very satisfactory condition in so far as its keeping and general sanitary condition is concerned. However, there are several repairs, some additions needed and we briefly set forth some of the needed repairs and suggest that the county commissioners give our suggestions proper consideration.

The cement work about one of the south windows needs repair. The floor in south room, also of the cells and corridors is in need of repair in several places. The drainage about the cells is bad, that is, water spilled or used on the floors does not drain or run off. We suggest that in repairing the floors that they be made with or on a slight grade, just sufficient to run the water off to one side or end and to such place that it may be carried off by proper sewer connection. The cells up and down stairs need general repairing, painting, etc.

There are several lights out in the different windows of the jail. We suggest that these be replaced at once, and that wire screens be placed on the outside of the windows. This will protect the windows from assault from the outside and will prevent the passing of anything into the jail from the outside.

We are told that the electric lights in the jail sometimes go out just when they are needed, and we suggest that the jail be furnished with gas as well as electricity for use in emergencies.

We call especial attention to the cleanliness of the kitchen, pantry, office and storeroom at the jail.

We recommend that the county commissioners pay for the building of the dog house at the jail. We are informed that the cost of same was \$44.47, and that the expense was paid by the sheriff personally.

We recommend water closet and bath for use of sheriff and jailor.

We recommend that the wall around the jail be made higher.

We recommend some repairs to the gutters and that some new gutters should be put in.

That a stone walk be built from the jail gate to the steps; that some drainage be provided for carrying the water off of the jail yard after rains.

Some slight repairs on the smoke-house or storeroom.

That the jail should be enlarged if practical at this time, as it is somewhat crowded.
